Instability in tele meadows area

Date
Sun, 01/28/2024 - 13:15
Activity
Skiing

Observed collapsing and shooting cracks near top of meadows around 7700 feet. Dug a pit in this area as well. Snow was 80 cm deep. Our test yielded unstable results - ECTP 11 35cm down on the obvious surgery facets. Slab seemed to be stiffening with warmer temps.

Region
Southern Madison
Location (from list)
Telemark Meadows
Observer Name
Chris Pruden
