Avalanche on Woody Ridge

Date
Mon, 01/29/2024 - 16:00
Activity
Skiing

West facing slope 9600' on Woody Ridge, North of the "Ozarks." Appeared to be new 1/29. Observed numerous older crowns and avalanches on all aspects throughout the day. Lots of whoomphing and collapsing, enough to shake small trees. Sorry the images arent great.

Region
Cooke City
Location (from list)
Woody Ridge
Observer Name
Nick Gaddy
