Fairy Lake Obs Sunday 20240407

Date
Sun, 04/07/2024 - 15:20
Activity
Snowmobiling

From email: "Riding was good - deeper than anticipated, though maybe not worth the damage and mud on the way out.

There were plenty of signs of storm snow instability, especially in the wind loaded terrain. Didn’t really need to dig to be on alert. We kept the angles relatively low all day, plenty of fun pow to ride in the trees. "

Riders also noted a human-triggered avalanche on the shoulder of Hollywood Bowl

Region
Bridger Range
Location (from list)
Fairy Lake
