

Large collapse near Ross Peak

Ross Peak

Bridger Range

4/3/2020

Code

Latitude

45.85860

Longitude

-110.95600

Notes

From obs: "Approached a lower angle east facing test slope around 8000 with similar [aspect](#) to ski objective. As I stepped out of my skis to dig a pit, we heard a large [collapse](#). Slope we were on was not steep enough to [slide](#) but we had our answer. Moved off that slope, dug a quick hasty pit CT12, 1.5 ft down on facets below ice crust, clean shear. Skied down an alternate conservative way."
