Notes

From 4/11/23: Yesterday (4/10) Colters released a wet [slide](#) (approx 1-3pm) that filled the top of the wiggle and left debris 300ft past the south bowl traverse (separate avalanche log entry). Today Stupor had a similar sized release just after noon.

The best noted natural release was a wet [slab](#) release on the southern edge of the football field that put a pile of debris below the cave.
