Whumpfing Mineral Mountain, Cooke City

Mineral Mountain Cooke City 2/19/2024 Code Latitude 45.03030 Longitude -109.99800 Notes

From obs: "While transitioning at the top of mineral mountain burn, a member of our party stepped away from our packed out transition spot and likely the deeper impact from his ski boots triggered the <u>weak layer</u> beneath us and created a massive whumf that propagated hundreds of feet and was strong enough to knock snow off of nearby trees. Nothing we observed slid but the collapse was extremely evident."
