Wet loose in hyalite

Date Wed, 01/15/2025 - 10:55 Activity Ice Climbing

Yesterday afternoon, 1/14, saw lots of roller balls and a few sizable sluffs come down around the dribbles area. This morning lots of small sluffs coming down around bingo cave as soon as the sun hit it. Noticeably heavy, wet snow on solar slopes as well.

Region Northern Gallatin Location (from list) Hyalite - main fork Observer Name Ben Farrell
