

Continued wind around Blackmore

Date

Sat, 02/01/2025 - 12:00

Activity

Skiing

Skied into South Cottonwood basin from Blackmore today. Skiing was sub-par with lots of wind scouring and intense active snow transport. Along with the slides observed yesterday, two recent R1-D1 slides were observed in South Cottonwood Basin: below the Dogleg and on N Twin's west wall via cornice break. No surface hoar, slides from today, or cracking/collapsing were observed.

Region

Northern Gallatin

Location (from list)

Mt Blackmore

Observer Name

E. Webb
